

**Annual
Listing of
Federally
Obligated
Projects**

Fiscal Year
2014

A summary of Federal transportation obligations in the Knoxville TPO Planning Area between October 1, 2013 and September 30, 2014

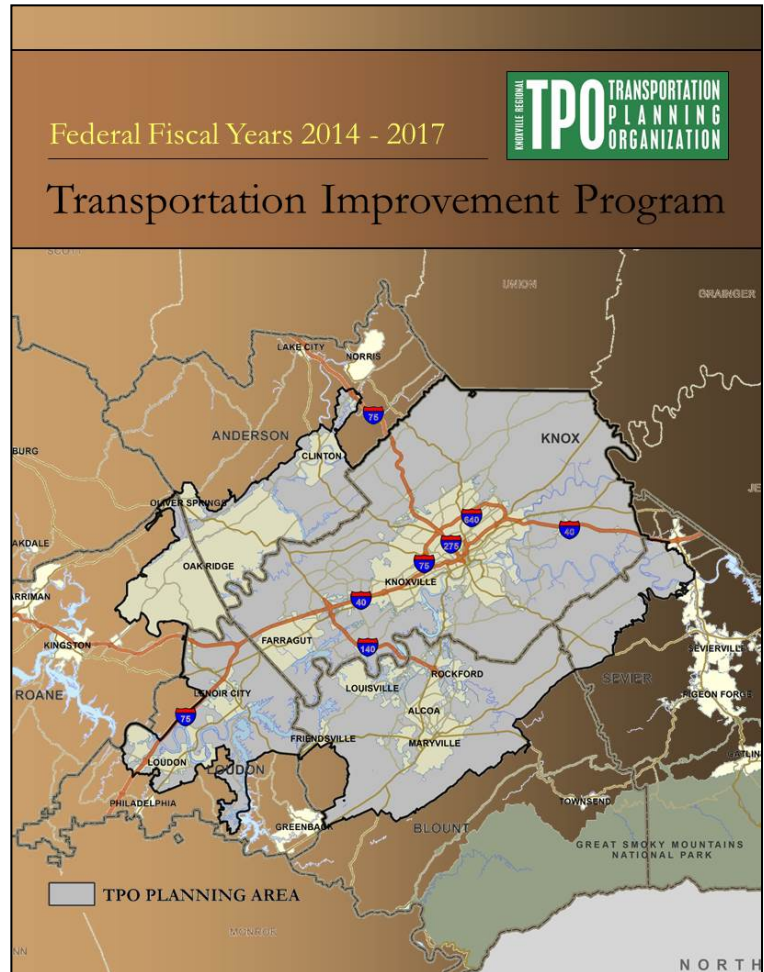

Purpose of This Report

The Knoxville TPO, according to the Moving Ahead for Progress in the 21st Century Act (MAP-21), is required to publish an annual listing of obligated projects for which federal funds have been given in the preceding year, including pedestrian and bicycle projects. The list of obligated projects is made available by the cooperative effort of the State, transit operators, and the metropolitan planning organization for review.

The annual listing of obligated projects for fiscal year 2014 are projects from the 2014-2017 Transportation Improvement Program (TIP). This program was developed in consultation with the Tennessee Department of Transportation (TDOT), Federal Highway Administration, Federal Transit Administration, and Environmental Protection Agency and adopted on October 2013 by the Executive Board.

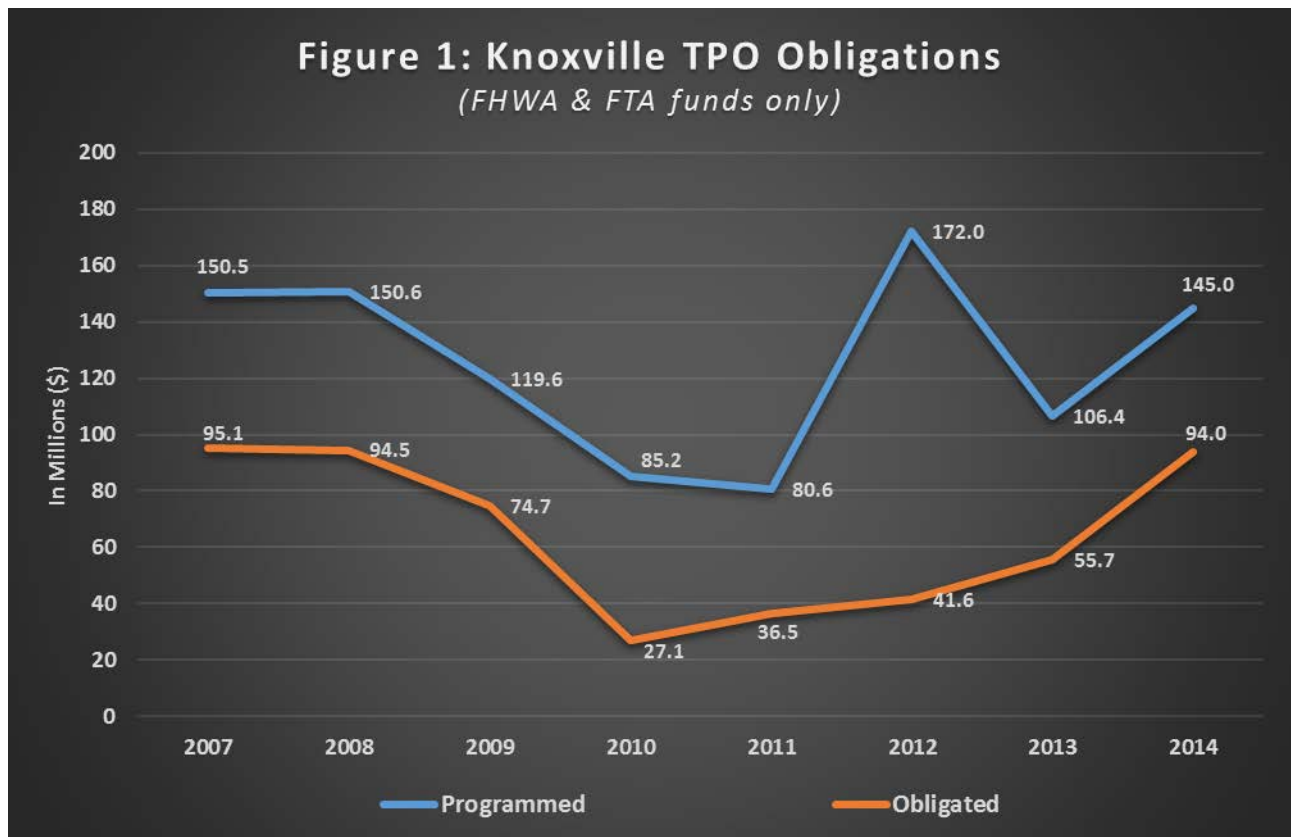

Two terms of importance used throughout the report are programmed and obligated funds. Programmed funds are funds that have been identified in the TIP for a particular project and phase. This is similar to writing a check from a banking account for the amount of the project phase listed in the TIP. Obligated funds are funds that have been committed to the project phase by the Federal government. The funds for the project phase are considered obligated when the check is cashed. Obligated projects are not necessarily initiated or completed in the same fiscal year and the amount of the obligation may not necessarily equal the total cost of the project.

Knoxville TPO Obligations History (Fiscal Years 2007-2014)

Projects programmed in the TIP for fiscal year 2014 totaled \$145.0 million, a 36 percent increase over programmed costs in 2013. This year, \$94 million, or 65 percent of the programmed amount was obligated (Figure 1), marking the largest share of programmed projects obligated in the last eight years.

Some of the larger obligated projects this year were the Henley Street Bridge (\$21.8 million), Cumberland Avenue Streetscape (\$11.1 million), and the Broadway Bridge Viaduct (\$10.2 million). These three projects accounted for 46 percent of the total amount obligated in 2014.

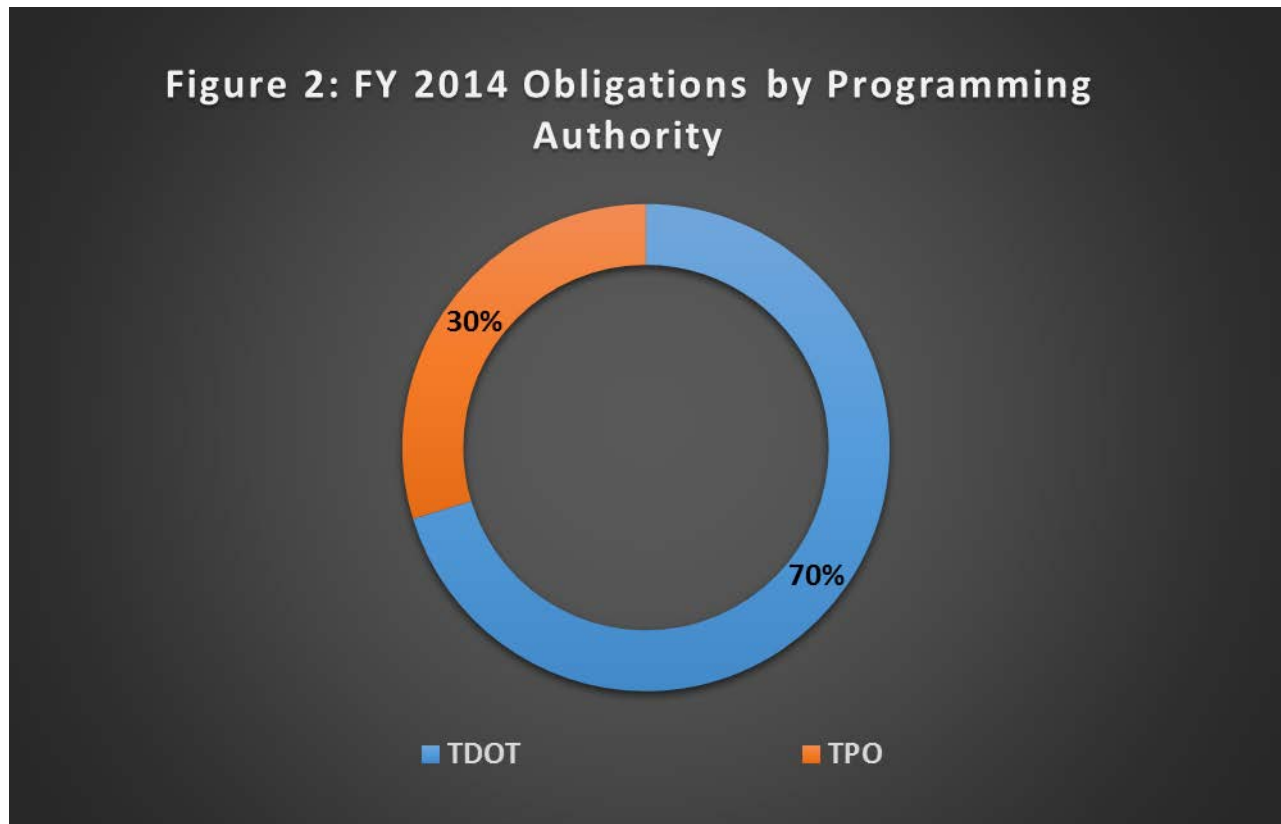

Summary of Fiscal Year 2014 Obligated Projects

Obligations by Programming Authority

Programming authority of federal funds is authorized by Congress to assist in construction, reconstruction, and improvement of transportation systems from highway/roadway projects, transit related projects, and pedestrian or bicycle improvements.

In 2014, \$94.0 million in federal funds were obligated in the TPO Planning Area. TDOT authorized \$66.1 million, or 70 percent of the funds, while the TPO authorized the remaining \$27.9 million (Figure 2).

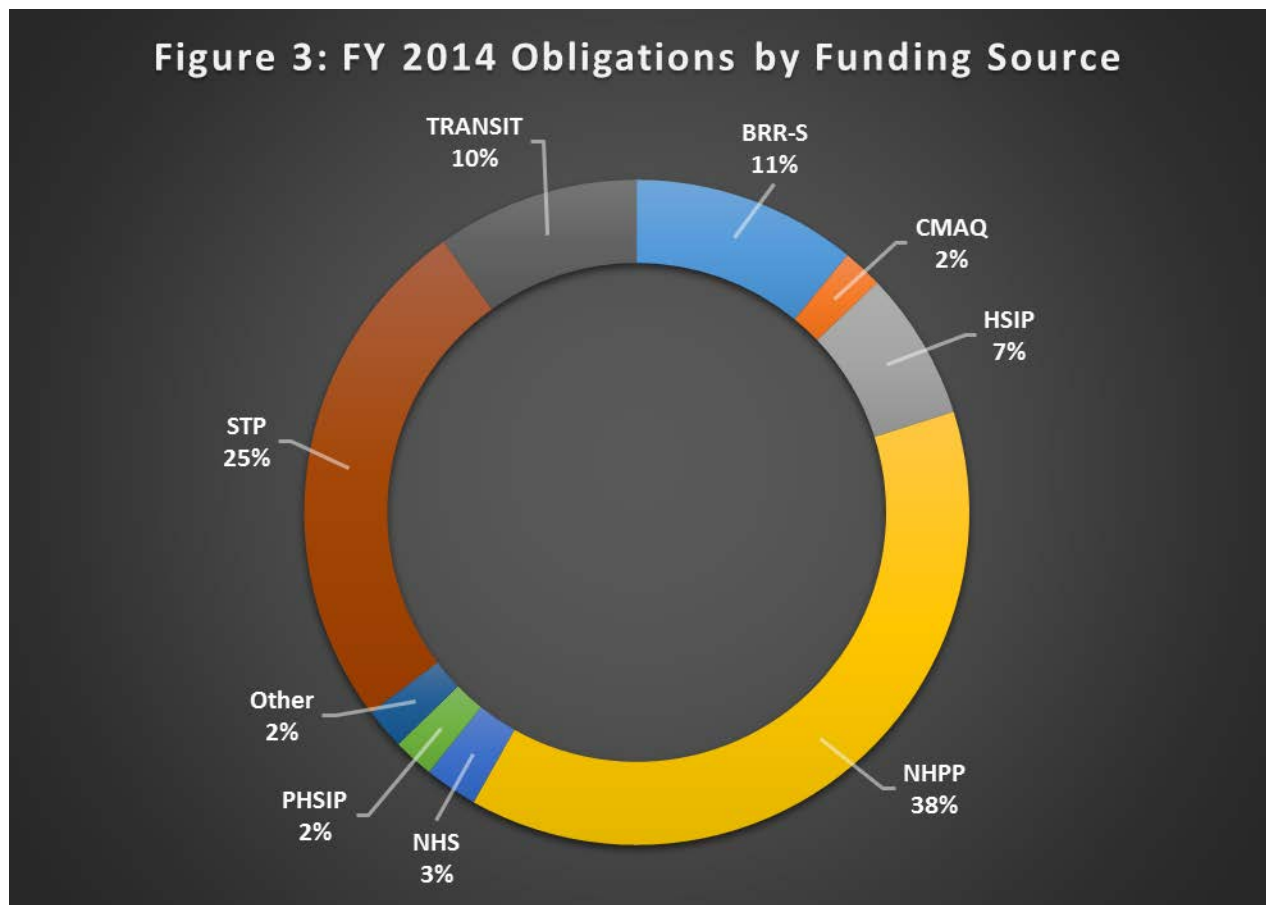

Obligations by Funding Source

The federal government provides multiple funding sources for the construction and preservation of state and local transportation infrastructure. The types of projects vary from new roadways, widening of existing roadways, intersection improvements, bridges, and general roadway maintenance. Other projects covered under federal funding are bicycle, pedestrian, and transit.

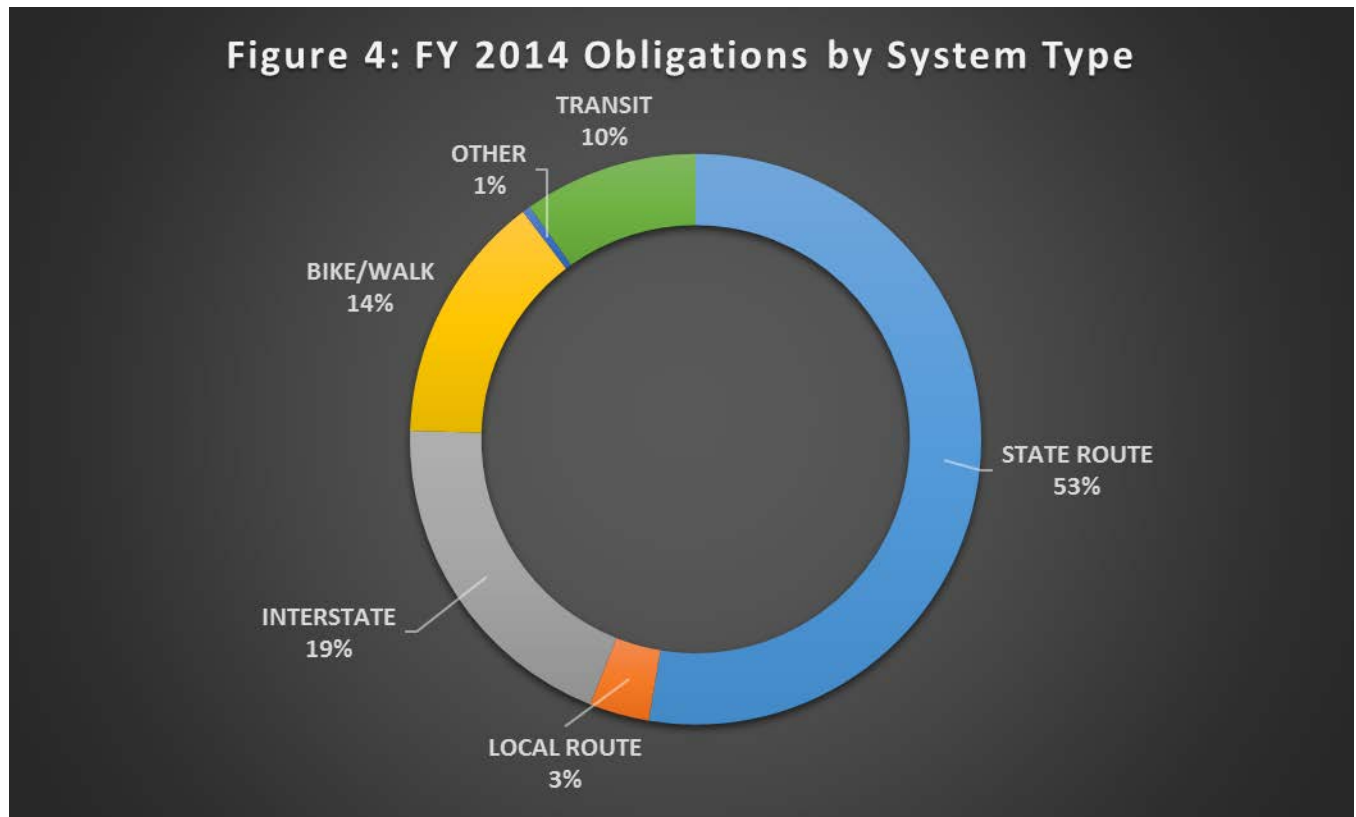

National Highway Performance Program (NHPP) funding accounted for the largest share (38 percent) of total obligations in fiscal year 2014 with \$35.7 million (Figure 3). NHPP funds are used by States to provide support for the condition and performance of the National Highway System through activities such as construction, reconstruction, resurfacing, preservation, and operation improvements. The second largest obligated amount was Surface Transportation Program (STP) with \$23.9 million (25.0 percent), while Bridge Repair and Replacement – State (BRR-S) and Transit funding followed with \$10.2 million and \$9.2 million respectively.

The remaining funding sources listed are Congestion Mitigation and Air Quality (CMAQ), Highway Safety Improvement Program (HSIP), National Highway Safety (NHS), Penalty Highway Safety Improvement Program (PHSIP), Transit includes Section 5307, Section 5309, Section 5310, Section 5316, and Section 5317, and Other includes funds from Transportation Alternatives Program, Safe Routes to School, Interstate Maintenance, Enhancement, etc.

Obligations by System Type

There are many systems comprising a local transportation network including interstate highways, state highways, county roads, local roads, transit, and bicycle/pedestrian facilities. The type of system plays a major role in funding eligibility. The largest amount of funds obligated were to state routes (53 percent), while Interstate was second with 19 percent (Figure 4).

KNOXVILLE REGIONAL TPO LISTING OF FHWA OBLIGATED PROJECTS FOR FISCAL YEAR 2014

Note: If the dollar amounts are enclosed in parantheses then the funds are credited toward the project.
