
2020 TDOT CONTRACT VANS AND BUSES

Mid- South Bus Center, Inc. has been in business since 1972, which makes us the oldest bus dealership in Tennessee under continuous operation. We take great pride in providing TDOT and its related agencies with the most reputable bus and van manufacturers in the industry; StarTrans Bus, Transit-Works, and BraunAbility. Our Startrans Bus is the only manufacturer on the TDOT contract offering **93" interior width**. As you know there are already challenges faced with interior room, loading and maneuvering passengers, and space is one of your highest priorities. We are glad to continue to offer the 93" wide StarTrans Buses again as we have for many years. In addition to our location in Murfreesboro, our customer service will assist TDOT and related agencies with local service working through Ford and Dodge dealers for the chassis, and pre-approved service providers for the body, lift, and air conditioning. **We also have available 3 mobile service technicians serving the three regions of Tennessee, East, Middle, and West.**
